

2026-09-29 - v2.2.0

New Features

- 5406 - MQTT - The Wave now pushes configuration updates over the broker when a parameter changes. You no longer need to poll individual topics to stay in sync.
- 5403 - New Auto Angle Calibration: Allows users to calibrate the angle using a side-drilled hole (SDH). The probe K-value can also be viewed within this calibration menu.
- 4919 - New touchscreen sensitivity option - Rain Mode - Good for environment where rain or electromagnetic noises can be an issue
